Presentation

I'm a Fullstack software engineer with experience in data science, algorithms, and machine learning, along with proficiency in cloud computing, I'm well-versed in project management and CI/CD lifecycles, ensuring efficient and successful outcomes. What sets me apart is my dedication to effective communication and collaboration, ensuring a nice approach to solving complex technical challenges.

Work Story

01/11/2023-01/12/2023 | IMCREATE/VECTORMGT | Fullstack Developer
During this period I was part of a team of 5 developers to implement payment methods from the client side to pay third party users. Additionally, I contributed to the innovative design of a Flutter Mobile App for the real estate sector. Orienting the model to companies and final costumers

02/2020-08/2023 | Appen - Contractor | Software Developer
I have strong experience as a backend developer creating solutions for data storage and streamlining data algorithms for different clients. among which implementation of serverless databases, Console Servers and Remote Hands Service. Recently I am expanding my knowledge towards a Fullstack figure. Adding popular UI libraries and frameworks. My studies allow me to work with a huge variety of technologies that today are expanding and capturing the market for their innovation and functionality.

Project Example

[PostgreSQL, Pandas, Oracle Virtual Machine, Kubernetes], connect 3 data centers in different cities (Milano, Mantova, Como) in Lombardy(Italy) region for storage and data management to create data reliability, security rules and dynamics with mobile app, webpage and database for a delivery & logistics company than has a international role in the EU. 6 Months Project deadline, finished on time Appen - Contractor. Software Developer

Main Skills

Front-end:
- React.js
- Next.js
- Vue.js
- Flutter
- Angular

Back-end:
- Node.js
- Django
- Flask
- FastAPI

Data Analysis:
- Pandas
- PandasAI
- Apache Hive
- Apache Spark
- PySpark

Artificial Intelligence (AI):
- PyTorch
- TensorFlow
- C/C++

Cloud:
- AWS
- Azure
- GCP

Virtualization:
- Oracle VM VirtualBox
- WSL
- Unix

Containerization:
- Jenkins
- Docker Swarm
- Docker Kubernetes
- Docker Cluster

Other tools:
- Git
- Bash
- Shell

Studies

Bachelor Degree Sc. Computer Science Università degli studi di Milano 09/2018-05/2023

Specialization Biotechnology Institute Technical Superior A. Volta 09/2028 - 06/2021

Languages

Italian - Native

Spanish - Native

English - Native

Portuguese -B1

COVER LETTER

Professional profile

What sets me apart is my unwavering commitment to personal growth and the acquisition of new knowledge. I thrive in dynamic environments where I am continuously challenged to learn and evolve. This commitment, combined with my ability to work both independently and as part of a team, positions me as a candidate who is not only capable but also passionate about contributing to the success of the company.

Featured Skills

- Database design and development.
- Microsoft Office (Word, Excel, PowerPoint, Microsoft Outlook, Microsoft Teams)
- Google Workspace (Google Docs, Google Sheets, Google Slides)
- Dropbox, Google Drive, SharePoint
- Efficient problem solving and attention to detail.
- Effective communication and ability to work as a team.
- Needs Assessment and Analysis
- System Testing and Parameterization
- Solution Design and Development
- End-User Training
- Technical Proficiency and Analytical Skills
- Communication Skills
- Continuity of Business Knowledge combined with Teamwork
- Planning and Analysis
- Autonomy and Organization
- Lifelong Learning
- Responsibility and Time Management
